## ***AN UPDATE ON FRANK BENEDICT***

**Frank Benedict** was hospitalized for 10 days because he had pains in his right thigh/hip. Then he was moved to Mt. Wasington Rehab Center on the 21st where he is receiving physical therapy to regain strength in his muscles and to learn to walk with a walker. As for the pain that **Frank** had is still somewhat of a mystery. A team of about 5 doctors met with **Frank** while he was at the hospital to try to determine what caused the pain. They are still unsure but **Frank's** oncologist suspects that it was because of the lymphoma nodes that swell (in response to the chemo that **Frank** took a month ago) and some of the enlarged nodes might have pinched the nerve. As **Frank** continues the second cycle of chemo and 4 more afterwards, The nodes are expected to shrink and they hope that he will not experience the same pain again. **Frank** will see a doctor who specializes in pinched nerves to find out more information. Physical Therapist said Frank improve alot. Good News ! Frank will be discharge on Friday (April 1st... Not April Fool). Thank you for your messages, support and **Frank** and **Ann** so appreciate our friendship with you.

**Roseanne Krisko** will have surgery on April 11th. She will have knee replacement. And Roseanne was so happy that new specialist doctor found what's wrong with her neck on March 18 but Dr found bad news cuz it's 5 different problems:-( Hope some treatments will improve instead of surgery. Yes,

**Roseanne** will keep working on newsletter for May.
